Section 1

Purpose, Scope, and Emergency Resources

Purpose

The purpose of this plan is to establish procedures and duties, to promote planning, and to establish staff training for fire, earthquake, bomb threats, chemical spill, and other emergency evacuations as required by Chapter 4 of the Seattle Fire Code, the Washington Administrative Code (WAC 296-24-567), and the UW All-Hazards Emergency Management Plan.

Scope

JISAO staff follow procedures and adhere to policies set and described by federal management on NOAA’s campuses. University staff on NOAA campuses will also follow University procedures listed below, if applicable. The listed sections are excerpts from the UW emergency plan; they also pertain to JISAO staff on NOAA campuses.

Coordination with Other Emergency Plans

An EEOP is a key component of Departmental Health and Safety Plans and University disaster planning. The EEOP must be coordinated with the following emergency/safety plans.

1. **The UW All-Hazards Emergency Management Plan**: The EMP provides the management structure, key responsibilities, emergency assignments, and general procedures to follow during and immediately after an emergency. It provides a temporary crisis management structure, which provides for the immediate focus of management on response operations and the early transition to recovery operations. The EMP includes procedures for communicating with the UW Emergency Operations Center as well as the management structure of the Incident Command System.

2. **Federal NOAA Emergency Response Plan**: This departmental plan has been coordinated as necessary with NOAA’s federal emergency response plan for the main campus and the Montlake campus in Seattle.

Coordination with Departmental Health and Safety Plans

The EEOP reflects the university’s emergency response procedures and programs and satisfies an element of the JISAO @ NOAA Health and Safety Plan required by the Department of Labor and Industries (WAC 296-24-567).

This departmental plan has been coordinated as necessary with other departmental plans as follows:

JISAO @ Wallace Hall Health & Safety Plan
http://jisao.washington.edu/staff-portal/emergency

University Emergency Resources and Contacts

Table 1 summarizes the UW’s emergency resources, contact information, and responsibilities of each emergency resource.
Emergency Communications

1. **Telephones**: The NOAA campuses’ telephone system will be used to the extent possible. In case of system failure or a power failure, campus phones will not function. JISAO personnel will serve as messengers if phone communication is not an option.

2. **Fire Alarm System**: The building fire alarm systems of the NOAA campuses are continuously monitored for alarm. All alarms result in an automatic response by Seattle Fire Department, and NOAA Campus Facilities Services response team.

Employee Orientation

New employees must be informed of the EEOP as part of their new employee safety orientation. This initial plan and all significant revisions to the plan should be routed to all personnel. The faculty and staff should be reminded of the plan as necessary and encouraged to discuss the plan with their research groups, students, and visitors. To assure the safety of all building occupants, the Evacuation Director and Evacuation Wardens will work together to assure all departmental employees are aware of the plan, and that students and visitors are also oriented as indicated in Section 2.

Evacuation Drills

Evacuation drills will be scheduled, conducted, and recorded for the NOAA campuses by federal personnel/NOAA staff.

</table>
A unit called “FOMS” or “Unit 2.” The FOMS respond automatically to all fire alarms, and other emergencies to provide support for the UWPD and SFD. This support includes, but is not limited to, the operating/resetting of the fire alarm system; operating the heating, ventilation, and air-conditioning systems (HVAC); and the shutdown of steam, water, electrical, and other utilities. Also provides ATC-20 teams for rapid structural assessments of buildings following earthquakes.

</tbody>
</table>

| UW Emergency Operations Center (EOC) | The primary EOC is located in UW Tower, 4333 Brooklyn Ave NE, Room C-140. The secondary EOC location is Poplar Hall, Rooms 105 & 106 | For a major local or regional emergency, the UW President or his/her designee may request activation of the University’s Emergency Operations Center (EOC). EOC staff will decide on the use of available resources and communicate with outside agencies and authorities. Information on missing persons, building emergencies, first aid, and other needs during a large-scale emergency must be provided to the EOC by using campus telephone systems, computer, (See Emergency Communications in Section 1) or by runner if the telephone systems fail. |

| KOMO 1000 AM | On the radio at AM 1000 and/or call UW 206-897-4636 | The Official Area Broadcast Station in case of major disaster or University “suspended operations.” Tune into this station for information. |

Report all emergencies to the NOAA Campus Security immediately.
Section 2

Building Evacuation: UW Personnel Duties and Responsibilities

An effective emergency evacuation and subsequent response requires the coordination of many occupants in a building. All building occupants, including employees, faculty, staff, and students, need to be aware of their roles and responsibilities in case of an emergency. This section outlines specific responsibilities for employees, faculty, and staff, as well as the Evacuation Director and Evacuation Wardens.

Responsibilities of UW Departments and Staff

Employees, Faculty, and Staff are responsible for:

1. Being familiar with and following EEOP procedures when required
2. Participating in drills and training as required
3. Orienting students with a brief overview of emergency evacuation procedures on the first day of class to assure that:
   - They are aware that evacuation is required when the alarm system is activated.
   - They know where the nearest exits are located (see Appendix K, and building plans in Appendix C).
4. Informing and assisting visitors unfamiliar with building procedures as appropriate prior to and during an emergency evacuation

Important Phone Numbers and Contact Information

Find the names and numbers of the floor wardens for the NOAA campuses in the evacuation plans which are listed on bulletin boards and internal websites following the federal guidelines.
Section 3

Specific Emergency Procedures

Procedure 1: Fire Emergencies and Building Fire Alarms

Procedures for Occupants

- When an alarm sounds on your floor or area, begin immediate evacuation following your floor plan (see Appendix C). Close doors behind you.

- If you discover a fire, activate the nearest pull station and call 9-1-1. Then you may attempt to put it out if it is small (no larger than a wastebasket) and you have called for HELP. If the fire is too large or you are uncomfortable or unfamiliar with the proper use of a fire extinguisher, simply close the door and evacuate.

- If the fire alarm does not work, call 9-1-1 and notify occupants verbally of the emergency and the need to evacuate. Evacuation Wardens or another responsible party needs to confirm that all occupants are notified.

- If you are on fire, STOP – DROP – ROLL. If another person is on fire, yell “STOP – DROP – ROLL.”

- Evacuate via the nearest stairwell or grade level exit. Do not block exit doors or wedge them in an open position. The doors must remain closed to keep smoke out and maintain safety for evacuation and fire personnel. Leaving doors open makes the stairwells dangerous and unusable. Persons with physical disabilities have several options (see Appendix D).

- Go to your pre-determined Evacuation Assembly Point (EAP) as outlined in Appendix C. You may have two or more EAP’s depending on the size of the building. Immediately report to an Evacuation Warden so that he or she can accurately track which occupants were able to evacuate. Evacuation Wardens will report to the Evacuation Director.

- If you are trapped by smoke, stay low, cover your mouth with a wet cloth, stay near a window, open it but do not break it, hang something out the window to let fire personnel know you are there and put something in the cracks around the door, phone 9-1-1 if possible.

Procedure 2: Earthquakes

During All Earthquakes

**Inside a Building**

- Take cover immediately under a desk, table, or chair, in a corner away from windows, along a wall in a hallway, or in a structurally strong location such as a hall by a pillar.

- Watch for falling objects such as light fixtures, bookcases, cabinets, shelves, and other furniture that might slide or topple. Stay away from windows. Do no run outside.

- Do not dash for exits since they may be damaged and the building’s exterior brick, tile, and decorations may be falling off.

- Do not use the elevators.

**Outside a Building**

- Remain outside

- Stay clear of electrical wires, poles, trees, or anything that might fall.
After a Major Earthquake

Evacuation Wardens shall:

- Check for injuries to personnel in your area. Do not attempt to move seriously injured persons unless they are in immediate danger. Render first aid assistance if required.

- Check for fires or fire hazards, spills of flammable or combustible liquids, or leaks of flammable gases. These activities must not significantly delay departure from the building or put the Evacuation Warden in danger.

- Turn off ignition and heat sources if properly trained and it is safe to do so.

- Exit the building, if possible, and go to the EAP to report on injuries, damages, and potentially hazardous conditions. Take emergency/first-aid kit and personal belongings. Account for persons in your area of responsibility. Mass assembly areas may be used in the event of a major earthquake and/or if the EOC is activated (Emergency Level 2 or 3 – refer to EMP). See Appendix O for a map of mass assembly areas on UW Seattle Campus.

- Do not reenter until the building has been declared safe by trained emergency personnel (Seattle Fire Department or the ATC-20 assessment teams).

- Use the telephone system only for urgent matters. Call or send a runner to the Emergency Operations Center or Unit Response Center to notify them of any needed assistance and emergencies that may exist. Use handheld radios or Ham radio services if telephone services are not available.

- Expect Aftershocks.

- Evacuation Wardens who are also CERT team members must fulfill their evacuation warden duties first before joining the CERT team response.

After a Minor Earthquake

- Restore calm.

- Examine your area for damage. Evacuation Directors may use the checklist in Appendix M to help assess if the building should be occupied, evacuated, and/or re-entered.

- Look for:
  - Damaged, leaking or ruptured utility lines (gas, water, electrical, telephone, computer network)
  - Toppled furnishings or equipment
  - Spilled hazardous materials
  - Damaged building components such as ceilings, walls, beams, columns, doors

- Evacuate the building if damage is found or the power is out. Report evacuation to UWPD or SFD. Do not reenter until the building has been declared safe by trained emergency personnel.

- Asbestos containing materials. Certain buildings will be evacuated for ALL earthquakes because of the potential damage of asbestos-containing building materials (see the list of buildings in Appendix M).

- Laboratories: Check for chemical spills. For small isolated spills, use spill cleanup procedures as outlined in "Laboratory Standard Operating Procedures". If the SOP or chemical spill cleanup kit is not available, then evacuate lab and notify authorities. For larger spills, evacuate building and notify authorities. See UW Laboratory Safety Manual for earthquake procedures specific to laboratories.
Procedure 3: Hazardous Material Spills

If the chemical spill endangers other people outside your workspace or might cause a fire, pull the nearest fire alarm to initiate evacuation and call the local fire department. Call 911 as soon as you are safe to let emergency personnel know what happened. Stay available to help emergency personnel.

If the spill caused serious injury or exposure, call 911 from any phone or location (except call 3000 at Harborview Medical Center.) For chemical exposure, use the eye wash or safety shower for 15 minutes, removing all clothing that is contaminated with the chemical.

If you have been exposed to a spill and are not sure whether or not you should seek medical attention, you should request an exposure assessment. Call the Employee Hall Health Clinic at 206-685-1026. If you are at Harborview Medical Center, call 206-744-3081.

The UW Police will notify the Seattle Fire Department who will respond to stabilize and contain the chemical spill, often leaving behind hazardous waste and contaminated equipment. If the hazardous waste is not properly cleaned up and packaged by the Seattle Fire Department, do not reoccupy the area. Contact Environmental Health & Safety at (206) 685-5835 for assistance.

Note that packaged waste must be handled according to chemical waste management policies and guidelines established in Section 3 of the Laboratory Safety Manual. Please Contact the EH&S Environmental Programs Office at (206) 685-5835 for assistance.

Procedure 4: Bomb Threats

Threat Recipients

- University personnel receiving telephoned threats should attempt to get the exact location where the bomb has been planted, or is going to be planted.
- Attempt to get as much information as possible about the caller, for example, male or female, accent, etc. (use the Bomb Threat Checklist).
- Listen for any background noise that may indicate the location of the caller.
- The checklist on the next page lists information that can aid in locating a bomb. Complete the checklist as soon as possible after receiving a threatening call and report it immediately to the University Police Department at 9-1-1 (TDD 206-543-3323), from a hardline telephone.
- Bomb threats received through the mail or by other means are also to be reported immediately to the UWPD.
Checklist 4: Bomb Threat Checklist

Questions to Ask Caller

When will the bomb explode?

Where is the bomb?

What does it look like?

What kind of bomb is it?

What will cause it to explode?

Did you place the bomb?

Why?

What is your name?

Where are you calling from?

What is your address?

Exact Words of Caller:

Describe the Caller's Voice  (Circle all that apply)

<tr>
<td>Phone number received at:</td>
</tr>
<tr>
<td>Person who received the call:</td>
</tr>
</tbody>
</table>

Report all bomb threats immediately to UWPD at 911 or (206) 543-9331
### Procedure 5: Suspicious Packages and Mail

<table>
<thead>
<tr>
<th>A suspicious letter may have…</th>
<th>A suspicious package may have…</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. No Return Address</td>
<td>1. Oily stains, discolorations, or crystallizations on the wrapper</td>
</tr>
<tr>
<td>2. Restrictive markings, such as “PERSONAL!”</td>
<td>2. Stranger odor</td>
</tr>
<tr>
<td>3. It is sealed with tape</td>
<td>3. Excessive tape</td>
</tr>
<tr>
<td>4. The address has:</td>
<td>4. Is rigid or bulky</td>
</tr>
<tr>
<td>• misspelled words</td>
<td>5. Lopsided or uneven</td>
</tr>
<tr>
<td>• is addressed to a title but not a person</td>
<td>6. The weight is odd for its size</td>
</tr>
<tr>
<td>• an incorrect title</td>
<td></td>
</tr>
<tr>
<td>• is badly typed or handwritten</td>
<td></td>
</tr>
</tbody>
</table>

**If you find a suspicious package or letter:**

1. Handle with care – do not shake or bump
2. Isolate it immediately
3. Don’t open, smell, touch, or taste
4. Treat is as suspect
5. Evacuate the area and call 9-1-1 from a safe location

**If you suspect the mail may contain…**

1. **A bomb or explosive**
   - Evacuate immediately
   - Call 9-1-1 from a safe location

2. **A radiological threat**
   - Limit exposure – do not handle
   - Evacuate area
   - Shield yourself from object
   - Call 9-1-1 from a safe location

3. **A biological or chemical threat**
   - Isolate – do not handle
   - Evacuate Immediate Area
   - Wash your hands with soap and warm water
   - Call 9-1-1 from a safety location

If the letter or package has already been opened and a powder or other substance has spilled from the it, **DO NOT CLEAN IT UP.** Leave it where it is, evacuate the area, wash your hands with soap and water, and call 9-1-1 from any campus phone.

Due to occasional anthrax threats in the United States, the Washington State Health Department and Center for Disease Control have issued guidelines to follow if you suspect a letter could contain dangerous substances. The guidelines sent out by these agencies are in the following section.
Procedure 6: Anthrax Threat

Background
Anthrax is a rare disease caused by bacteria, which is capable of forming spores that can survive in the environment for long periods of time. In an intentional exposure, such as a bioterrorism event, breathing in the spores is the most likely route of exposure that might lead to a serious infection.

Inhalation anthrax (through the lungs) is the most serious type of anthrax. It is caused by inhaling anthrax bacteria into the lungs. Initial symptoms may resemble those of flu or a common cold, such as fever, cough, headache, chills, weakness, difficulty breathing, and chest discomfort. After several days, the symptoms may progress to severe breathing problems and shock. This type of anthrax infection is often fatal if not treated promptly.

In the event of a suspected anthrax attack, follow the instructions below.

Instructions

1. **Follow Procedure 5 for suspicious letters and packages**
   - DO NOT open the package
   - Call 9-1-1 to request police and fire
   - If a powder or other substance spills out of the letter/package, **DO NOT CLEAN IT UP**
   - Evacuate the immediate area, and keep others away
   - Immediately wash your hands with soap and water
   - Ensure that all persons who have handled the letter or package wash their hands
   - Wait for the police and fire personnel to arrive
   - Start a list of names and telephone numbers for all persons who have handled the letter and who were in the immediate area when the letter/package was opened

2. **Police and fire personnel will:**
   - Secure the area and the suspicious letter or package
   - Assess and determine whether a credible threat exists
   - Contact appropriate public health and other response officials
   - Decontaminate people and their clothing as appropriate

3. **Persons with probable or known exposure:**
   - Will be directed to seek immediate medical attention
   - Will be monitored by local public health to ensure appropriate treatment and follow-up

4. **People without known exposure:**
   - Should be assured that infection without known exposure is rare
   - Should seek medical care for further concerns following the incident
   - Should understand that there are not routine screening tests available to detect Anthrax infection in persons without known exposure to Anthrax spores

5. **After the Spill of a Powder or Other Substances**
   - If police and fire deem there is a credible threat, they will determine who will clean the affected area before personnel will be allowed to return.
   - If police and fire personnel deem that there is no credible threat:
     - Clean up should be performed by following established protocols for cleaning spills
     - Facilities without protocol should use a 1:10 solution of household bleach in water
     - Powders should be wetted before disturbing them during clean-up
Procedure 7: Medical Emergencies

There is a First Aid and CPR guide located in all first aid kits. These guides give detailed steps in the event of a heart attack, CPR and infant CPR, choking, bleeding, poisoning, and burns, as well as other injuries. EH&S recommends First Aid/CPR training for a handful of building volunteers to assist with medical emergencies associated with building evacuation and emergencies.

In the Event of a Medical Emergency

1. **Stay calm.** Assess the situation. Look for a Medic Alert bracelet or necklace on the person requiring help.
2. **Have someone call 9-1-1.** If you are alone, yell as loudly as possible for help. If you are unable to summon help, you have to call 9-1-1 first, and then return and assist the person to the best of your ability (see below).
3. **When calling 911,** give the operator as much information as possible, i.e. type of emergency, what help is needed, exact address, building name, room number, telephone number, information from Medic bracelet or necklace, and victim information. Don’t hang up until you are told to do so by the 911 operator.
4. **Do not move the victim.**

Procedure 8: Civil Demonstrations

1. The Use of University Facilities (UUF) division may be notified of an upcoming campus demonstration. In turn, the UWPD Special Operations Lieutenant will then be notified via e-mail or at (206-685-2550). Advanced planning of a campus demonstration can minimize disruption to normal campus activities. Should you find that a demonstration is causing a disruption to classes or businesses on our campus, contact the UWPD at 9-1-1 or the Special Operations Lieutenant at 206-685-2550.
2. In the unlikely event that a demonstration becomes destructive, get away from the area of potential harm and call 9-1-1. Have the building coordinator lock the main entrance. This will admit only persons with proper authorization to enter by swiping an employee access card.

Evacuation Wardens and Alternates

Find the names and numbers of the floor wardens for the NOAA campuses in the evacuation plans which are listed on bulletin boards and internal websites following the federal guidelines.

UW First Aid Plan Guidelines

University of Washington First-Aid Plan Guidelines

The UW First Aid Plan does not apply to the NOAA Campuses. Please look up the federal First Aid Plan as posted on bulletin boards and internal websites following the federal guidelines.
Appendix B

Building Evacuation Plan

Evacuation Assembly Points

The Evacuation Assembly Point (EAP) should be an open area away from the building and out of the way of responding emergency personnel. Establish primary and secondary EAPs in case the primary cannot be occupied during or after an evacuation. A separate EAP may be necessary for earthquake evacuation.

Occupants meet after evacuation so that they may be accounted for or lend assistance as needed. There may be more than one assembly point depending on the size of the building and the location of the exits. Some EAPs may be unsuitable for assembly following an earthquake event.

The primary and secondary Evacuation Assembly Points (EAPs) for the buildings on the NOAA campuses are listed on bulletin boards and internal websites following the federal guidelines.

Building occupants will assemble at the primary EAP following a building evacuation. If the Evacuation Director finds the primary EAP unsuitable, then evacuees will be moved to the secondary EAP. Areas of Safe Refuge should be established inside the building for persons with disabilities or for buildings with more than four levels. Indicate each floor’s designated EAPs and Areas of Safe Refuge on each emergency evacuation floor plan.

Note: Evacuation drills are necessary to refine the evacuation procedure.

Areas of Safe Refuge

Occupants should have an Area of Safe Refuge (inside the building) four floors below their floor of origin if the building is designed for partial evacuation (i.e., only fire floor and floor above alarm).

Establish areas of safe refuge for persons with disabilities. Maintain a list of these locations that will be used by persons with disabilities, a system to account for persons with disabilities, and means to communicate with persons taking refuge in these areas. See Appendix D for further information.

Evacuation Plans

Evacuation plans for the buildings on the NOAA campuses are listed on bulletin boards and internal websites following the federal guidelines.

Occupants should go to the nearest exit when the alarm sounds. If access to the nearest exit is obstructed, an alternate exit should be taken.
Appendix C

Emergency Evacuation for Persons with Disabilities

Background

This appendix provides a general guideline of evacuation procedures for persons whose disabilities could make exiting difficult during building evacuations. Faculty, staff, students and visitors with disabilities must develop their own facilities’ evacuation plans and identify their primary and secondary evacuation routes from each building they use.

Points of Emphasis

- Be familiar with evacuation options.
- Seek evacuation assistants who are willing to assist in case of an emergency.
- Ask supervisors, instructors, Disability Resources for Students, Disability Services Office, or Environmental Health & Safety about evacuation plans for buildings.

Evacuation Directors and Evacuation Wardens need to pre-identify staff, faculty, and students with disabilities and their locations. Determine their evacuation options, identify Areas of Refuge, coordinate obtaining an Assisted Evacuation Device (as needed – see below), and determine how they will evacuate from the building.

Individuals are also encouraged to sign up for UW Alerts on the UWEM website. UW Alerts will broadcast information electronically during crises or emergencies that may disrupt routine UW campus operations.

Evacuation Options for Persons with Disabilities

Persons without disabilities must evacuate to the nearest exit. Persons with disabilities have five basic evacuation options.

- **Horizontal evacuation**: Use building exits to the outside ground level or go into unaffected wings of multi-building complexes.
- **Stairway evacuation**: Use steps to reach ground level exits from the building.
- **Stay in Place**: Unless danger is imminent, remain in a room with an exterior window, a telephone, and a solid or fire-resistant door. With this approach, the person may keep in contact with emergency services by dialing 911 and reporting his or her location directly. Emergency services will immediately relay this location to on-site emergency personnel, who will determine the necessity for evacuation. Phone lines are expected to remain in service during most building emergencies. If the phone lines fail, the individual can signal from the window by waving a cloth or other visible object.
- **Area of Refuge**: With an evacuation assistant, move to an area of refuge away from obvious danger. The evacuation assistant(s) will then go to the building evacuation assembly point and notify the on-site emergency personnel of the location of the person with a disability. Emergency personnel will determine if further evacuation is necessary.
- **Assisted Evacuation Device**: In the event of a major earthquake or other campus-wide event that would prevent first responders from responding quickly, an assisted evacuation device such as a chair, can be used by trained personnel to evacuate mobility disabled persons.

Disability Guidelines

Prior planning and practicing of emergency evacuation routes are important in assuring a safe evacuation. In addition, helpers and others who may assist those with disabilities are reminded to always ask someone with a
disability how you can help before attempting any rescue technique or giving assistance. Ask how he or she can best be assisted or moved.

**Mobility Impaired: Wheelchair**

Persons using wheelchairs should stay in place, or move to an area of refuge with their assistant when the alarm sounds. The evacuation assistant should then proceed to the evacuation assembly point outside the building and tell SFD or UWPD the location of the person with a disability. If the person with a disability is alone, he/she should phone emergency services at 911 with their present location and the area of refuge they are headed to.

If a stair landing is chosen as the area of refuge, please note that many campus buildings have relatively small stair landings, and wheelchair users are advised to wait until the heavy traffic has passed before entering the stairway.

Stairway evacuation of wheelchair users should be conducted by trained professionals (Fire & EMS). Only in situations of extreme danger should untrained people attempt to evacuate wheelchair users. Moving a wheelchair down stairs is never safe.

Evacuation devices such as evacuation chairs may be used when first responders are unavailable. This could occur following a campus-wide emergency such as an earthquake or weapons of mass destruction (WMD) event. The following requirements must be met when using evacuation devices:

- Contact EH&S at 206-616-5519 to identify an appropriate device and determine where to store or place the device. In general, this will apply to departments with a mobility impaired employee whose primary work location is above the ground floor.
- Assign a primary and secondary user of the evacuation device.
- Each user must be a trained Evacuation Warden who has attended the Evacuation Warden training class offered by EH&S.
- Train each user on the proper operation and use of the evacuation device. Coordinate this training with EH&S Building and Fire Safety (206-616-5519).
- Update and document this training annually.
- Install the evacuation device in a location where it cannot impede egress of others from the building. The device will be used only by the assigned users and only when first responders are unavailable to assist a mobility impaired person to evacuate.
- Evacuation devices will be available for use by specially trained Evacuation Wardens only.
- Update the building’s Emergency Evacuation and Operations Plan by describing the standard operating procedures for the evacuation device.

About the UW All-Hazards Emergency Management Plan (EMP)

Background

In June of 2005, the University of Washington published a revised comprehensive Emergency Management Plan (EMP) for campus operation during large scale or campus-wide emergencies. Copies of the EMP are available at the Emergency Management website below:

http://www.washington.edu/emergency/ep

The following is a summary of the EMP.

The UW All-Hazards Emergency Management Plan

The EMP provides guidelines for the management of the immediate actions and operations required to respond to an emergency or disaster. The overall priorities of the University during a disaster are the protection of lives, live assets, valuable research processes, property, the community, and the environment. The overall objective is to respond to emergency conditions and manage the process of restoring University academic and research
programs and services. This plan represents the Campus Emergency Management Plan, which encompasses the facilities, services and the administration of the UW Seattle campus.

**Purpose of the Emergency Management Plan**

This plan provides the management structure, key responsibilities, emergency assignments, and general procedures to follow during and immediately after an emergency. The University has established this plan to address the immediate requirements for a major disaster or emergency in which normal operations are interrupted and special measures must be taken to:

- Save and protect the lives of students, patients, employees, and the public.
- Manage immediate communications and information regarding emergency response operations and campus safety.
- Provide essential services and operations.
- Provide and analyze information to support decision-making and action plans.
- Manage University resources effectively in the emergency response.
- Ensure University-wide compliance with federal National Incident Management principles and requirements.

This plan does not supersede or replace the procedures for safety, hazardous materials response, or other procedures that are already in place at the University. It supplements those procedures with a temporary crisis management structure, which provides for the immediate focus of management on response operations and the early transition to recovery operations.

It is important to point out that this EMP does not cover specific departmental operations, even for those departments assigned emergency response functions. All departments must establish their own emergency operations plan that considers their specific needs and how they will interface with the UW EMP.
